

COLOR ME!

I'm Sniffy. As a skunk, I know about bad smells – like the rotten egg smell that is added to natural gas to help you know if there is a natural gas leak.

If you ever smell natural gas in the air, remember: **Smell Gas? Act Fast!** This means don't delay—get away! Leave the area and go tell an adult right away. Once everyone is far away from the smell, tell the adult to call your natural gas company so we can fix the problem.
